Introduction

The following bibliography, including 892 items, is a continuation and an extension of the previous bibliography presented at Ljubljana in July 2003, and at Rome in 2005, in the framework of the 9th and 10th International Conference of Facet Theory.

This updated bibliography is the result of an intensive internet search and lists, provided by FTA members, of their relevant publications. We hope that the bibliography will encourage additional colleagues to send their references in the future. Although this bibliography is the largest by far in this field, it is still incomplete.

In the meantime, the FT contributions are becoming very impressive. We found 415 journal articles and 477 articles or chapters in books published during the 68 years of the FT’s existence. On average, there have been an average of twelve articles published yearly since the beginning of Facet Theory in 1941. During the last 13 years, this average has increased to some 33 articles per year. This data indicates that Facet Theory is beginning to be more widely accepted in the academic community. The following table presents the number of publications every year from 1941 till 2009.
